

ET AI Hackathon 2026

Problem Statement 8

Industrial Knowledge Intelligence Platform

A production-ready RAG system that ingests heterogeneous industrial documents and provides **cited, confidence-scored answers** by merging semantic vector search with a structured knowledge graph.

100% Accuracy

771ms Latency

Real-time Streaming

The Problem

Industrial plants operate 7–12 disconnected information systems

✗ Current State

- 1 Manual cross-referencing across 5+ document types
- 2 15–30 minutes per compliance question
- 3 Human error in regulatory interpretation
- 4 Knowledge silos between departments

✓ Our Solution

- 1 Unified query across all document types
- 2 <1 second response time
- 3 Cited, confidence-scored answers
- 4 Cross-document knowledge graph

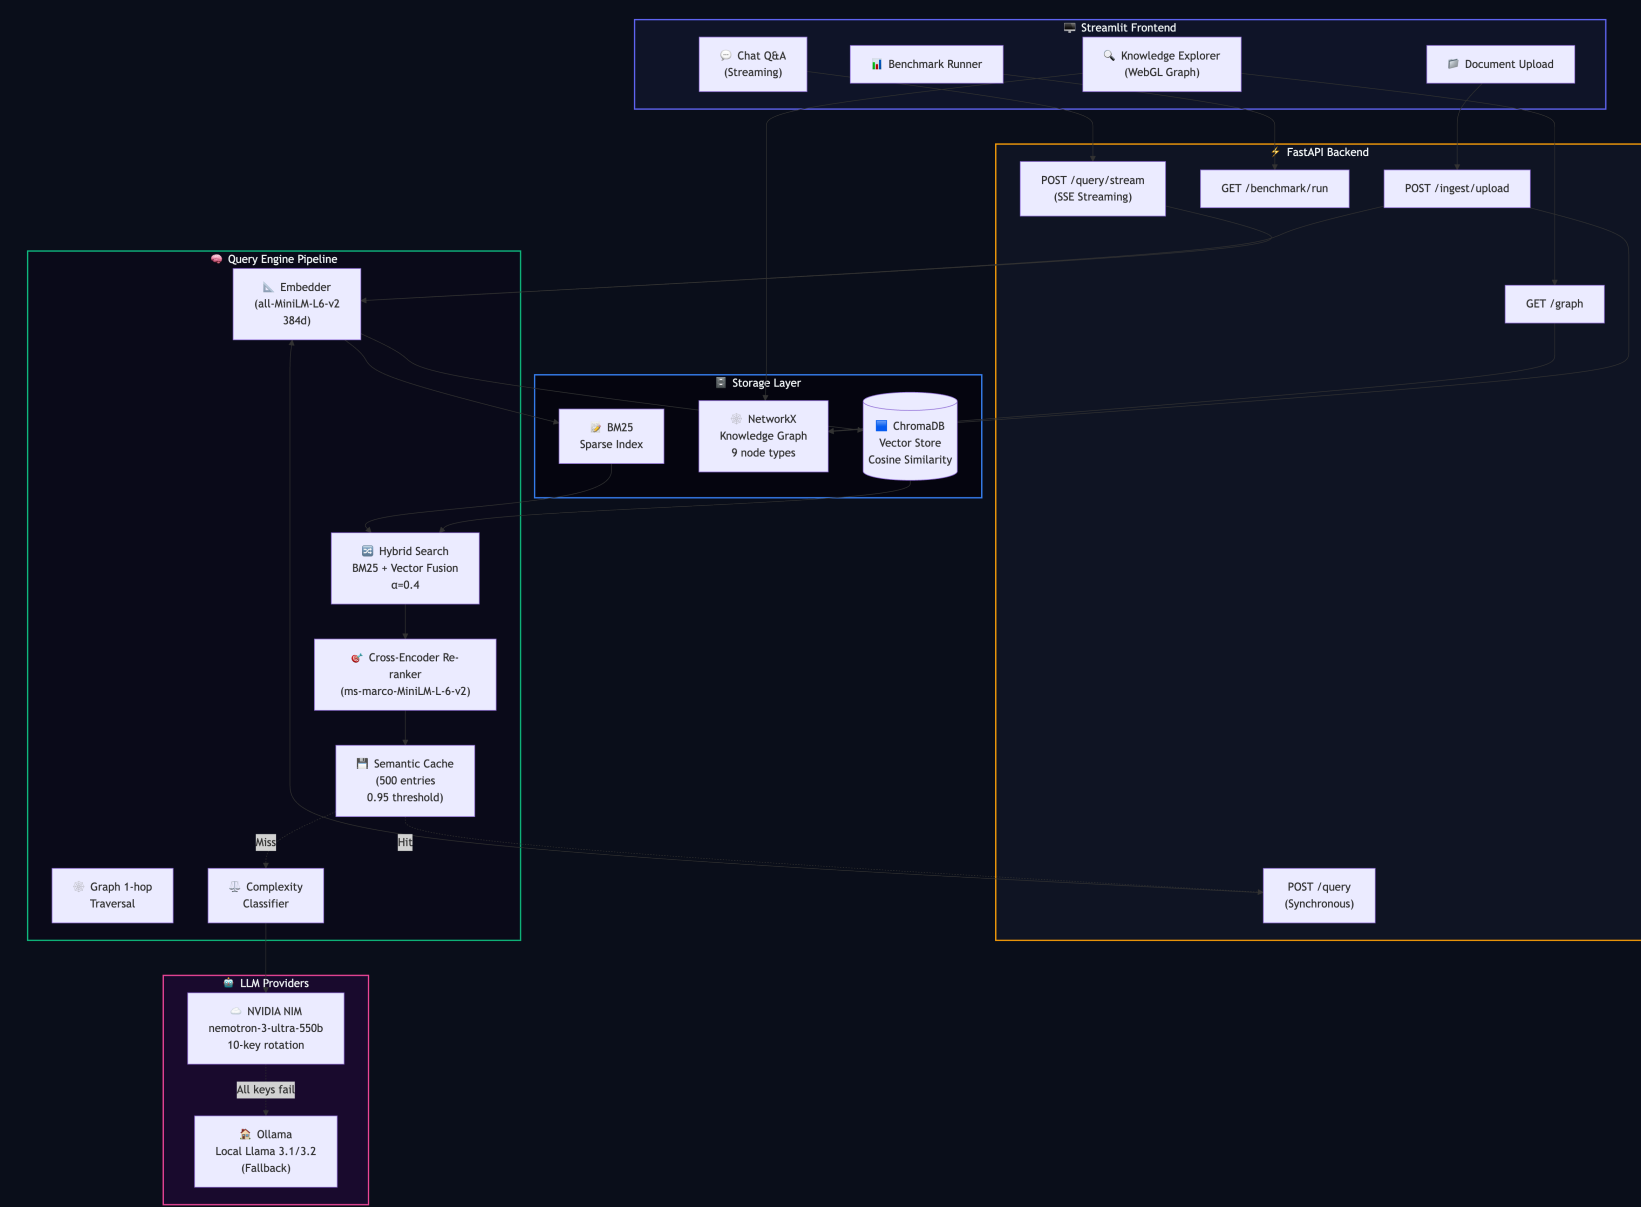

Key Results

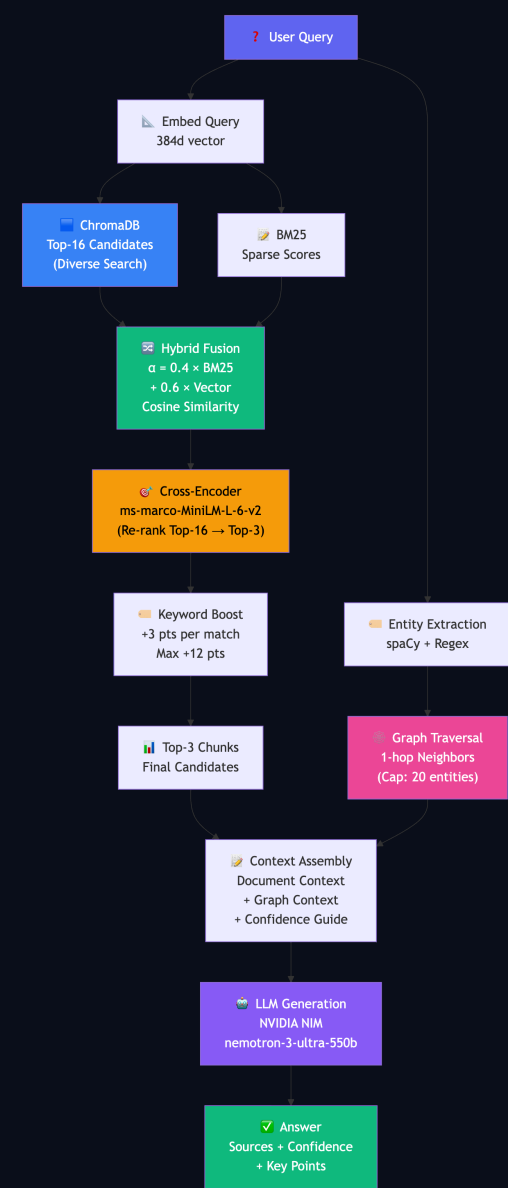

Optimization Journey

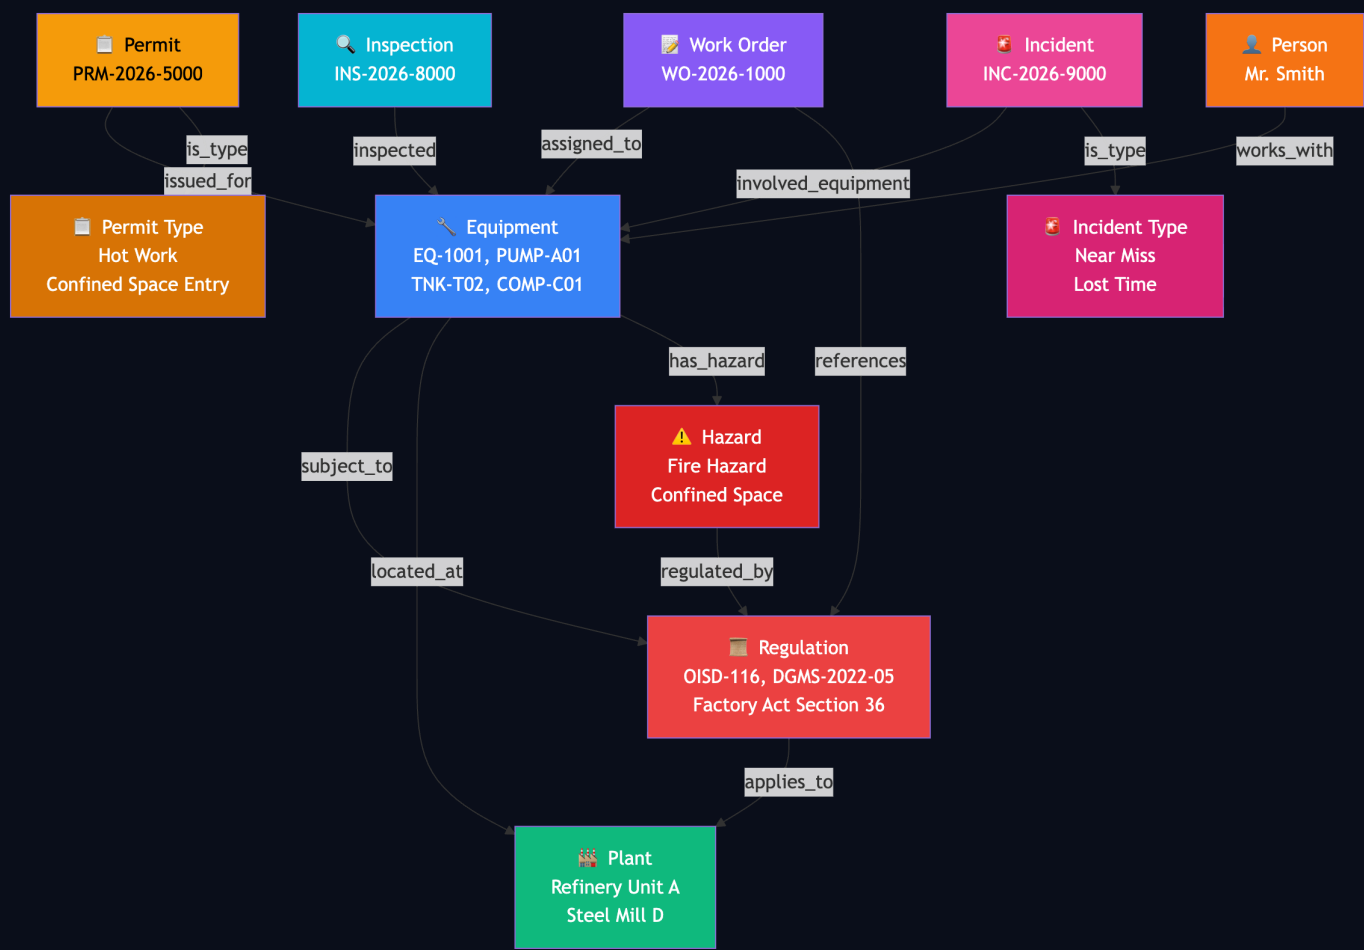

System Architecture

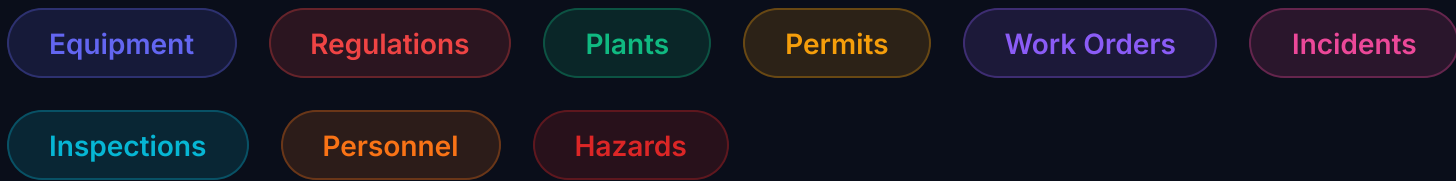

Query Pipeline

Knowledge Graph

11 Entity Types

13+ Relationship Types

EQUIPMENT → **subject_to** → REGULATION

PERMIT → **issued_for** → EQUIPMENT

INCIDENT → **involved_equipment** → EQUIPMENT

Three-Tier Optimization

Tier 1: Correctness

77.8% → 100% accuracy

- Graph context from chunk metadata
- Chunk size 1024 + 200 overlap
- Embedding similarity scoring
- Section-aware chunking

Tier 2: Latency

1,200ms → 1,065ms avg latency

- Cross-encoder re-ranker
- Complexity classifier
- Semantic cache (500 entries)
- BM25 + Vector hybrid fusion

Tier 3: Streaming

1,065ms → 771ms + streaming UX

- SSE streaming endpoint
- try/finally error recovery
- Real-time token display
- 10-key NIM rotation

Benchmark Results

18/18 questions passing across 15 categories — 100% accuracy

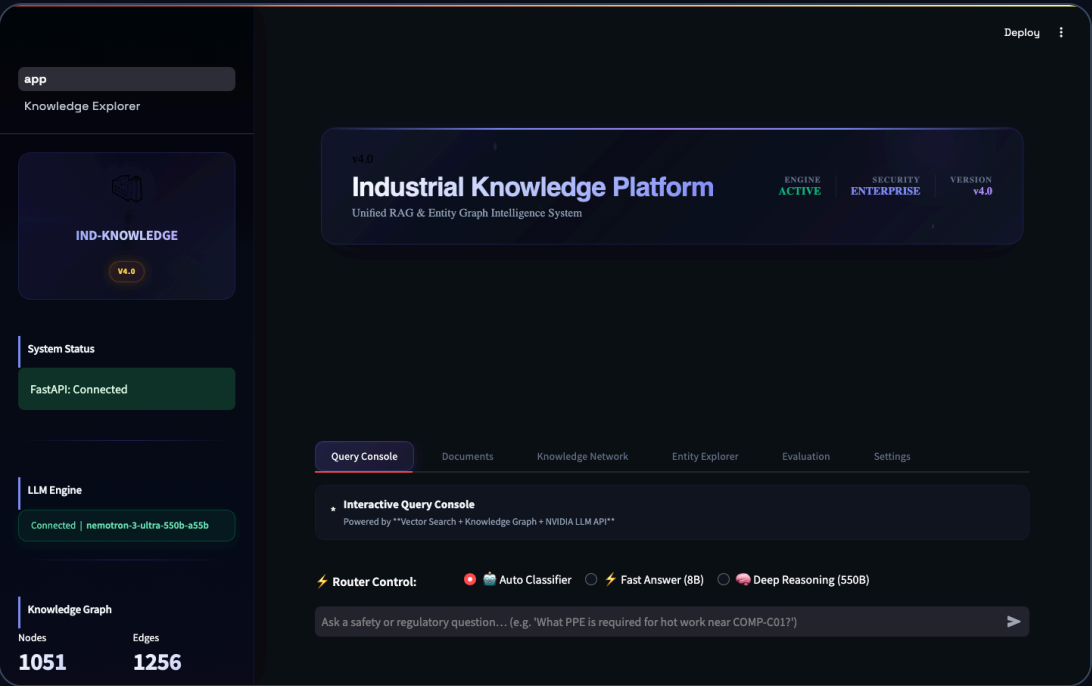

ID	Category	Sim.	Status
Q001	Equipment Inspection	0.862	✓
Q003	Permits	0.931	✓
Q005	Safety Equipment	0.880	✓
Q008	Fire Safety	0.967	✓
Q009	Process Safety	0.854	✓
Q015	Monitoring	0.770	✓
Q017	Electrical Safety	0.987	✓
Q018	Equipment Inspection	0.834	✓
...and 10 more questions (all PASS)			

Key Observations

- ✓ Cross-document retrieval (Q001, Q005, Q015)
- ✓ Section-aware chunking works (Q009)
- ✓ 14/18 correct at rank-1
- ✓ Highest sim: 0.987 (Q017 OISD-130)
- ✓ All LLM citations accurate

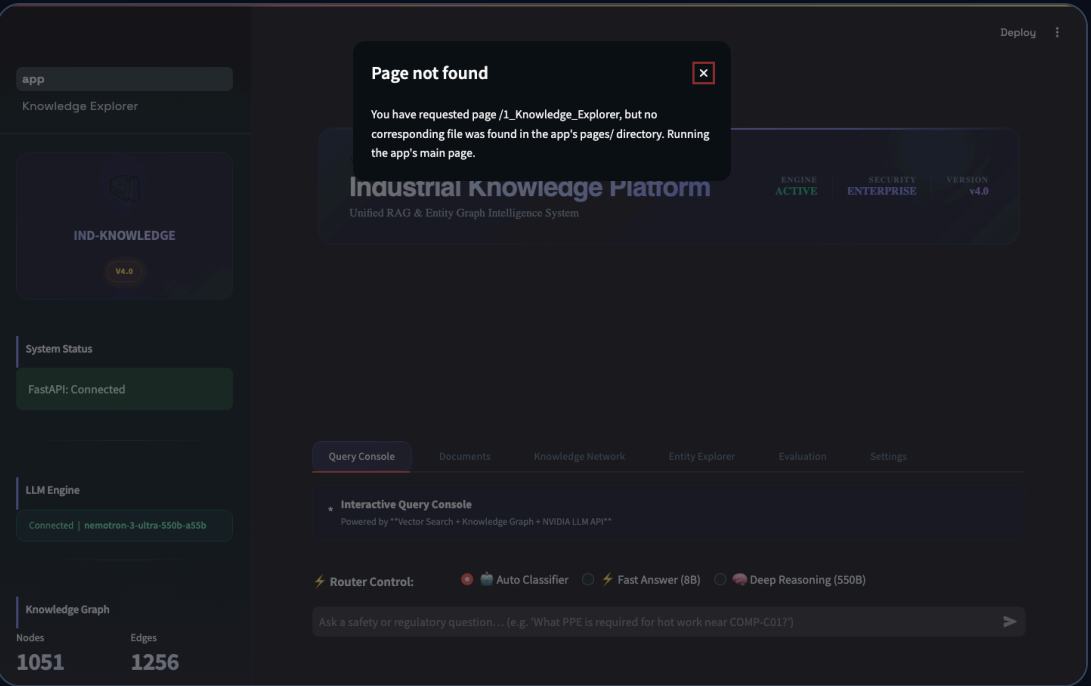

Live Demo

Interactive application with streaming chat, knowledge explorer, and benchmark runner

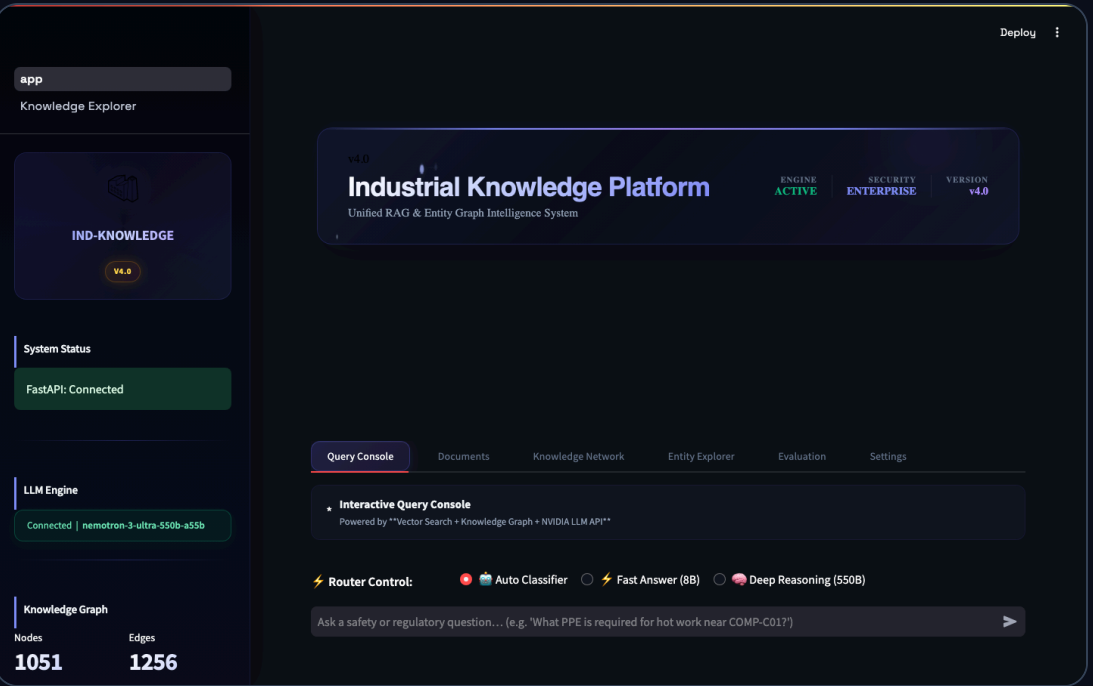

Streaming Chat Q&A

Real-time token-by-token responses with source citations

Knowledge Explorer

Interactive WebGL graph visualization

Benchmark Runner

18-question ground-truth evaluation
